ATHRA Diesel / Petrol / Electric Locomotive Restoration Award

The ATHRA Diesel / Petrol / Electric Locomotive Restoration Award is awarded annually to encourage and recognise excellence in the restoration of locomotives by individuals and groups operating in the railway and tramway tourist and heritage sector of Australia. The winner will receive a plaque to be retained in perpetuity.

The Award will be judged in accordance with ATHRA Awards General Rules and Conditions and the specific requirements set out below:

1. The Award is open to diesel, petrol and electric locomotives providing the restoration is complete at the time of entry and that it was completed within the past 3 years.
2. The Award certificate and plaque will name the type of locomotive winning the award, i.e. diesel, petrol or electric.
3. The Award is open equally to operational and static restoration projects.
4. Entries will only be accepted from the owner and/or operator of the locomotive.
5. An owner or operator may submit more than one entry for the Award.
6. Judging will be based on submissions conforming to the following requirements:
 - a. A typed account of the restoration project not exceeding 2000 words (excluding annexures). The account should cover the project from the condition of the locomotive before restoration commenced through to completion. The emphasis of the account should be on the restoration effort itself and the skills of the people undertaking the restoration work. The account should also identify the person or people whom you consider contributed the most effort to the project.
 - b. A sequence of colour photographs comprising of up to:
 - i. three taken before restoration commenced showing the extent of the task ahead;
 - ii. four taken during restoration showing different aspects of work undertaken;
 - iii. three taken on completion.
7. Entries shall also include two photographs suitable for promotional use.
